

## Report of the Training « volunteering and supporting activities »

This training aimed to support the volunteer of different organization to act in their voluntary work. To do so, we made a training of 1 week with 28 trainees from Askar camp, Nablus, Nabi Saleh, Dheishe. This training was organized by an international team of 6 trainers, French and Palestinian. Several Palestinian organizations participated to the training: Koffyeh center from Askar camp, Laylac from Dheishe camp, the cultural center of Nabi Saleh and the youth municipal council of Anabta.

### Monday

We started by a presentation of the all training, its goals :

- to empower ourselves and our practice
- to develop our own opinion, to express and to explain it to the others
- learning by doing, not to sit during one week on a chair but to practice, to meet the other and to learn from that... no teaching, just learning, sharing
- to practice activities, to provide new ideas and new ways to organize our practice (group)

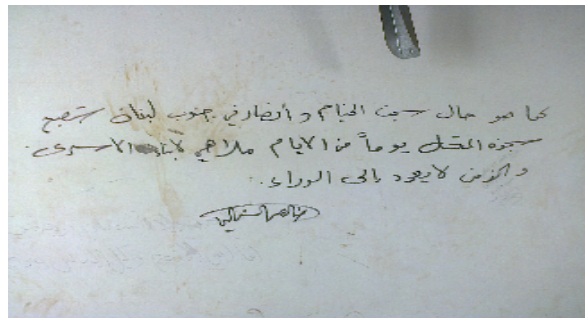

of children, life of the group, basic rules, rôle of youthworker..)

- to strengthen emancipation and educational process

Then we made a presentation game :

- in a paper each person has to write four characteristic/information about himself and his/her life. 3 has to be right and 1 wrong.
- During 5 minutes, the person has to gather 2 by 2 and to present themselves. After a while we meet all together and the person has to present themselves as if they were the other.

Then we made 3 groups and we visited the center together, we went to the old jail.

After a break, we hold a discussion about the role and the skills of a volunteer. The method was the following :

- during one minute all the person write in a paper what is a volunteer, what is the voluntary work,
- after they meet another person and exchange, complete
- the they meet another group
- and then all together we discuss about the topic and sum all the idea in a paper.

After what we try to focus on the point they don't agree to develop the ideas.

Then we made a game.

To finish we did an evaluation of the first day. To do so we explain that we want :

- the trainees to argue and to criticize any details of the training, because we want their opinion and to modify the training and to make it as closer as possible with their wills and needs.

- Because as volunteer we need to be able to evaluate our practice.

**Tuesday**

Presentation of the day, reaction about the evaluation / feed back of the demands.

We start the activities : puppets, circus and « activities from the garbage »

Discussion about children right :

- brainstorming : what is the right of the children
- we read 3 article from the right of children, especially : right of association and right to express himself and discuss about what we understand from those article and how we can organise it in our centers... (explain tools and methods)

**Wednesday**

Presentation of the day

Activities : build with newspaper, doing some staff with woods,

Then we had a discussion about some problem we can face in our daily voluntary work with the children. We made 2 groups, each one has to think and to resolve a problem. Then the group present it to the other and we continue to discuss all together.

« No one has the truth, each one build his one way with the other ».

The 2 problem were :

- A child is hungry before the lunch time.
- Two children don't like each other.

### Thursday

Continue the activities without any new propositions, the idea was to show that the rôle of the volunteer is not just to propose but mainly to support. Explaining by doing, we made the experience of this process. Doing so, we highlight that an activity can last more than one day and that we can permit it.

We played outside and discuss about the games in 2 groups. The analysis of the games take place to support the volunteer in their voluntary work : to support them to consider that any games can be modify, adapted. But also to be able to understand the impact of the games in the group life and on the educational process.

**Friday**

« gibs/plâtre », society games/playing with cards, making/to create some stories

Discussion about the discrimination. Each person write in a paper a discrimination he/she faced. Then we exchange the paper, someone else read it and we discuss from it (taking in consideration that we are responsible of a group where this discrimination take place).

**Saturday**

to finish the activities and prepare an exhibition.

discussion about :

- « to work with a Team », from some picture to help to speak about himself
- « activities » : from the experience we shared during the week

**Sunday**

Day of the ceremony of the certificate and global evaluation

Two strong point :

- learn from each other in one team (this feedback come from the trainers and the trainees)
- to be able to do something great from anything.

### **About the global project of training center**

During this training we host some representative of the youth and sport ministry that renew their support to our project.

Some journalist also came, here you have an article of Al Qods newspaper, national palestinian press :
